## RENEW PAINTING OF THE CAROLINAS

---

# Romabio Classico Limewash

## 1. The Challenge with Painting Brick

Painting brick is a widely used option that can provide a fresh look—but it's not always ideal long-term. Brick is naturally porous and needs to 'breathe,' and some paints can interfere with that over time. Painted brick can also require ongoing maintenance and may show wear in the form of peeling or cracking.

## 2. What is Limewash?

Limewash is a traditional, mineral-based coating made from slaked lime. It creates a soft, velvety finish that ages with charm and allows your brick to breathe naturally. It's breathable, eco-conscious, and patinas over time for an elegant, lived-in feel.

## 3. Why We Use Romabio Classico Limewash

Romabio's Classico Limewash gives homeowners a timeless, custom look with character. Unlike paint, it forms a mineral bond with the brick and can be easily rinsed off within the first two days to create a distressed, antique look. It's safe, breathable, and will never peel or chip. The finish can be touched up easily for future adjustments and is ideal for homeowners seeking charm and versatility.

- **Optional Protection with Romabio Mineral Shield**

To keep your limewashed look clean and protected in areas that see extra moisture or wear, we offer Romabio Mineral Shield. This clear, breathable topcoat adds water resistance without changing the texture or appearance. It's perfect for areas like chimneys, porch bases, and lower walls near landscaping.

## 4. Our Process: Customizable, Elegant, Proven

We guide you through a smooth, transparent process: 1) Color testing and consultation, 2) Surface cleaning and prep, 3) Application of Classico Limewash, 4) Optional distressing to reveal brick texture, 5) Final inspection and touch-ups. We treat your home with respect and care from start to finish.

## Trusted Craftsmanship. Timeless Results.

Renew Painting of the Carolinas is a certified Romabio PRO+ applicator. Our team brings expert technique and a love for masonry to every project. We specialize in finishes that elevate your brick while preserving its integrity for years to come.
